DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6-20-02 has been entered.

Applicants' amendment filed 3-25-02 has been entered. Claims 8-12 have been canceled. Claims 1-5 and 7 are pending and under consideration.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(f) he did not himself invent the subject matter sought to be patented.

(g)(1) during the course of an interference conducted under section 135 or section 291, another inventor involved therein establishes, to the extent permitted in section 104, that before such person's invention thereof the invention was made by such other inventor and not abandoned, suppressed, or concealed, or (2) before such person's invention thereof, the invention was made in this country by another inventor who had not abandoned, suppressed, or concealed it. In determining priority of invention under this subsection, there shall be considered not only the respective dates of conception and reduction to practice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

2. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lishko et al., US Patent No. 5,753,263.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The present application discloses a method to inhibit chemotherapy-induced alopecia by delivering a nucleotide sequence encoding p21 protein to hair follicles of a mammal, wherein said nucleotide sequence can be contained in a vector or liposomal formulation.

Lishko discloses a method of preventing chemotherapy-induced alopecia by delivering an expression vector comprising a nucleic acid molecule coding for p21, entrapped in a liposomal composition (column 45, 46). Thus, claims 1-5 and 7 are clearly anticipated by Lishko.

Claims 1-5 and 7 are rejected under 102(f) or (g) as the issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of the present invention needs to be resolved.

Since the Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see M.E.P.. 2302), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A

Art Unit: 1633

terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Failure to comply with this requirement will result in a holding of abandonment of this application.

It should be noted that the amendment filed 3-25-02 requesting deletion of inventors Ming Zhao and Norimitsu Saito is incomplete and improper. Ming Zhao, Norimitsu Saito and Lingna Li are considered the inventors of the present application. It is unclear how Li, who **contributes**, i.e. to give or supply in common **with others**, to the subject matter of claim 1, could be the sole inventor of the present application but Ming Zhao and Norimitsu Saito do not invent the subject matter of the present invention. In naming Zhao and Saito as the original jointing inventors, the original declaration filed 2-7-00 establishes that at least one of Zhao or Saito contributed to or solely invented the subject matter of original claims 1-5 and 7. Therefore, applicants' petition under 37 CFR 1.48(b) to correct inventorship filed 3-25-02 is improper. If the original declaration was in error with respect to claims 1-5 and 7, then applicants must comply with 37 CFR 1.48(a) to correct inventorship (see 37 CFR 1.48(a) (1) to (5)).

Conclusion

No claim is allowed.
